

SPRING BREAK IDEA

PLANT A FAMILY TREE

1. Plant your tree.
2. Keep your kids involved! Be sure to let them help as much as possible with the actual planting and care of the young tree; anything that involves digging in the dirt or spraying water from a hose is bound to entice them.
3. Visit our website to view our 'How-to plant a tree' sheet by scanning the QR Code below.
4. Once your new tree is in the ground, gather the family around it for a group photo. Make this picture taking an annual event and collect the photos together in an album. Tag us on Facebook or Instagram @BuchanansPlants
